

CLERGY MANDIZVIDZA

PROFESSIONAL SUMMARY

Multi-Skilled Maintenance Engineer and Utilities Technician with 6+ years of hands-on experience across power distribution, industrial plant maintenance, solar PV systems, borehole engineering, and high-voltage grid operations. Fully certified in City & Guilds 18th Edition Wiring Regulations (BS 7671) with strong technical foundations in Fuels & Energy Engineering (4 years completed + industrial placement).

Experienced in electrical fault-finding, pump maintenance, three-phase systems, LOTOTO, MCC panels, VSDs, and reactive breakdown response. Currently operating within a high-pressure FMCG manufacturing environment under a valid Skilled Worker Visa, seeking sponsorship to transition back into engineering within the UK utilities, manufacturing, or industrial maintenance sector.

EDUCATION

Bachelor of Science, Fuels and Energy Engineering, 02/2019 to 12/2022
Chinhoyi University Of Technology - Zimbabwe

- **Core Specialized Modules:** Power Systems Analysis, Electrical Machines, Energy Distribution Networks, Safety Engineering.
- **Academic Achievement:** Achieved top-tier marks including 76% in Combustion Technology and 75% in Thermal Power Plants.

A-Levels, Sciences(Mathematic and Physics)
Highfield High School - Zimbabwe

UK PROFESSIONAL QUALIFICATIONS & VERIFICATION

- **City & Guilds (UK):** 18th Edition of the Wiring Regulations BS 7671 (Fully Certified)
- **Ecctis (UK ENIC):** Statement of Comparability – Application Processing (Verifying UK RQF Level 5 / Higher Education Diploma Standard for Engineering Studies)
- **Languages:** IELTS C1 (Band 7)

ENGINEERING & INDUSTRIAL WORK HISTORY

Dunbia | Multi-Skilled Operative (Engineering-Aligned FMCG Environment)

Preston, UK | Jan 2023 – Present

Although not titled as a dedicated engineering role, this position involves continuous interaction with industrial machinery and safety-critical equipment in a high-pressure FMCG environment.

CONTACT

Address: 39 Oxford Road Bamber Bridge, Preston, Lancashire, PR56LQ
Phone: 07458676460
Email: mclergy06@gmail.com
Nationality: Zimbabwean
Permit: B , BE, fkg

VISA STATUS

Active UK Skilled Worker Visa (In-Country / Eligible for Immediate Change of Employment Sponsorship)

PORTFOLIO

cmandie.github.io
Engineering project gallery including solar installations, battery storage, borehole systems, industrial maintenance, and line-work operations.

CORE TECHNICAL SKILLS

- Electrical Engineering**
- BS 7671 compliance
 - Safe Isolation & LOTOTO
 - 3-Phase power distribution
 - MCC panels, VSD installation & tuning
 - Cable splicing, termination & routing
 - Fault-finding & diagnostic testing
 - Substation operations & transformer checks

- Mechanical & Fluids**
- Pump installation, alignment & repair
 - Pressure tank commissioning
 - Pneumatic tools & mechanical fault diagnosis

- Maintain high-speed production equipment within a regulated, multi-million-pound facility.
- Perform daily mechanical checks, precision sharpening, and safe cleaning of industrial assets.
- Identify and mitigate mechanical hazards to ensure safe line operation.
- Operate under strict HACCP, food safety, and internal engineering compliance frameworks.
- Work 12-hour shifts in a fast-paced environment typical of UK food manufacturing plants.

Zimbabwe Power Company (ZPC) | Electrical Engineer (Grid Operations)

Harare, Zimbabwe | Jun 2022 – Dec 2022

- Installed and commissioned HV/LV electrical infrastructure to improve grid reliability.
- Conducted voltage drop mapping, load calculations, and detailed engineering surveys.
- Executed grounding, bonding, and rigorous testing for live-line safety.
- Supported capital installation projects across regional grid networks.

ZESA | Fuels & Energy Engineering Placement

Harare, Zimbabwe | Dec 2021 – Jun 2022

- Performed PPM and reactive fault response on overhead and underground networks.
- Interpreted electrical schematics to reduce downtime through layout improvements.
- Diagnosed transformer faults, phase defects, and insulation failures.
- Executed HV safe isolation protocols before switching operations.

Megawater Zimbabwe | Maintenance Technician

Harare, Zimbabwe | Jul 2020 – Dec 2021

- Maintained industrial pumps, motors, and fluid-handling systems.
- Conducted rapid fault isolation and repair to prevent production losses.
- Developed maintenance protocols improving machine longevity and efficiency.
- Managed spare-parts inventory for major component overhauls.

ZETDC | Assistant Electrical Linesworker (Part-Time)

Harare, Zimbabwe | Jan 2017 – Aug 2021

- Supported overhead line maintenance, pole climbing, and conductor replacement.
 - Participated in emergency response operations during major network faults.
 - Installed hardware across distribution grids under senior supervision.
-

- Conveyor systems & industrial machinery maintenance
- P&IDs, fluid dynamics, plant overhauls

Solar PV & Energy Systems

- PV array mounting & structural alignment
- Hybrid inverter configuration (Mecer, MUST, Synapse)
- Battery storage integration (LiFePO₄, 24–96 kWh)
- DC/AC protection systems
- Load balancing & energy optimisation

Safety & Compliance

- HACCP
 - Working at height
 - Risk assessments & hazard identification
 - Permit-to-work systems
 - PPE compliance
-
