

CLERGY MANDIZVIDZA

PROFESSIONAL SUMMARY

Multi-Skilled Maintenance Engineer and Utilities Technician with 6+ years of hands-on experience across power distribution, industrial plant maintenance, solar PV systems, borehole engineering, and high-voltage grid operations. Fully certified in City & Guilds 18th Edition Wiring Regulations (BS 7671) with strong technical foundations in Fuels & Energy Engineering (4 years completed + industrial placement).

Experienced in electrical fault-finding, pump maintenance, three-phase systems, LOTOTO, MCC panels, VSDs, and reactive breakdown response. Currently operating within a high-pressure FMCG manufacturing environment under a valid Skilled Worker Visa, seeking sponsorship to transition back into engineering within the UK utilities, manufacturing, or industrial maintenance sector.

EDUCATION

Bachelor of Science, Fuels and Energy Engineering, 02/2019 to 12/2022

Chinhoyi University Of Technology - Zimbabwe

- **Core Specialized Modules:** Power Systems Analysis, Electrical Machines, Energy Distribution Networks, Safety Engineering.
- **Academic Achievement:** Achieved top-tier marks including 76% in Combustion Technology and 75% in Thermal Power Plants.

A-Levels, Sciences(Mathematic and Physics)

Highfield High School - Zimbabwe

UK PROFESSIONAL QUALIFICATIONS & VERIFICATION

- **City & Guilds (UK):** 18th Edition of the Wiring Regulations BS 7671 (Fully Certified)
- **Ecctis (UK ENIC):** Statement of Comparability – Application Processing (Verifying UK RQF Level 5 / Higher Education Diploma Standard for Engineering Studies)
- **Languages:** IELTS C1 (Band 7)

ENGINEERING & INDUSTRIAL WORK HISTORY

Dunbia | Skilled Butcher | Preston, UK 01/2023 – Present

- Maintain continuous, high-speed line operations within a heavily regulated, multi-million-pound FMCG manufacturing facility running 12hours daily.
- Execute daily operational checks, precision mechanical sharpening, and safe asset cleaning of high-volume industrial processing equipment.

CONTACT

Address: 39 Oxford Road Bamber Bridge, Preston, Lancashire, PR56LQ

Phone: 07458676460

Email: mclergy06@gmail.com

Nationality: Zimbabwean

Permit: B , BE, fkg

VISA STATUS

Active UK Skilled Worker Visa (In-Country / Eligible for Immediate Change of Employment Sponsorship)

PORTFOLIO

cmandie.github.io

Includes full engineering project gallery, solar installations, borehole systems, industrial maintenance, and line-work operations.

CORE TECHNICAL SKILLS

Electrical Engineering

- BS 7671 compliance
- Safe Isolation & LOTOTO
- 3-Phase power distribution
- MCC panels, VSD installation & tuning
- Cable splicing, termination & routing
- Fault-finding & diagnostic testing
- Substation operations & transformer checks

Mechanical & Fluids

- Pump installation, alignment & repair
- Pressure tank commissioning
- Pneumatic tools & mechanical fault diagnosis

- Ensure absolute compliance with stringent industrial health, safety, and hygiene frameworks, including HACCP and internal safe-working systems.
- Manage workstation safety protocols, actively identifying, reporting, and mitigating physical and mechanical line hazards to protect team safety.
- Directly accustomed to the fast-paced, high-pressure shift environments characteristic of major UK food manufacturing plants.

Zimbabwe Power Company (ZPC) | Electrical Engineer (Grid Operations) | Harare, Zimbabwe **06/2022 – 12/2022**

- Installed and commissioned heavy electrical power infrastructure to enhance regional grid reliability, load distribution, and circuit capacity.
- Conducted detailed engineering site surveys, voltage drop mapping, and load calculations for high-voltage and low-voltage capital installations.
- Executed strict grounding, bonding, and rigorous testing activities to guarantee absolute crew safety during live-line utility operations.

ZESA (Zimbabwe Electricity Supply Authority) | Fuels & Energy Engineering Placement | Harare, Zimbabwe **12/2021 – 06/2022**

- Conducted utility-level planned preventative maintenance (PPM) and rapid reactive fault responses across extensive overhead and underground networks.
- Interpreted complex electrical schematics and blueprints to engineer layout modifications, significantly reducing operational downtime.
- Utilized specialized industrial test equipment (Multi-meters, insulation testers) to diagnose electrical faults, phase defects, and transformer issues.
- Formulated on-site risk analyses and executed high-voltage safe isolation protocols (LOTOTO) before conducting switching operations.

Megawater Zimbabwe | Maintenance Technician | Harare, Zimbabwe **07/2020 – 12/2021**

- Maintained automated industrial machinery, fluid-handling assets, and high-capacity fluid distribution pumps via strict PPM schedules.
- Prevented critical production losses by rapidly identifying, isolating, and repairing complex electrical and mechanical machine failures.
- Developed data-driven asset maintenance protocols, significantly extending machine longevity, pump alignment, and systemic energy efficiency.
- Managed comprehensive stock controls for industrial spare parts, ensuring minimal downtime during major component and gearbox overhauls.

ZETDC | Assistant Electrical Linesworker (Part Time) | Harare, Zimbabwe **01/2017 – 08/2021**

- Supported senior linesmen in heavy maintenance, pole climbing, conductor replacements, and hardware installation across distribution grids.
 - Participated in emergency rapid-response operations to safely restore regional power supply following major network faults.
-

- Conveyor systems & industrial machinery maintenance
- P&IDs, fluid dynamics, plant overhauls

Solar PV & Energy Systems

- PV array mounting & structural alignment
- Hybrid inverter configuration (Mecer, MUST, Synapse)
- Battery storage integration (LiFePO₄, 24–96 kWh)
- DC/AC protection systems
- Load balancing & energy optimisation

Safety & Compliance

- HACCP
 - Working at height
 - Risk assessments & hazard identification
 - Permit-to-work systems
 - PPE compliance
-
